INSTRUCTIONS

- Line up your hand crotch with the prompt.
- Use a vertically placed pencil to help visualize the proper hand location.
- Don't press your hand against the pencil, just place it gently at the edge.
- Your index finger will determine your glove size.
- Your finger length should match the width of your hand.
- If your finger lands in between sizes, we recommend sizing down.

WHAT IF MY LENGTH AND WIDTH DON'T MATCH?

- This is very common, and we make gloves with shorter fingers for this very situation*.
- If your fingers measure shorter than your width, your size is Width short.
- For example, fingers are S and width is M, your glove size is M short.

Short finger sizes are only available for The Vermonter style for now.
